Company Summary

CDI is a union subcontractor specializing in interior framing, drywall, and finish systems for complex commercial, institutional, and public-sector projects. We self-perform critical scopes from rough framing through high-level interior finishes, providing General Contractors with a single, accountable trade partner capable of maintaining schedule, quality, and manpower demands.

Our team consists of experienced, field-proven professionals with a strong track record on large-scale, high-profile projects throughout New York City, including airports, healthcare facilities, arenas, and major mixed-use developments. CDI is known for reliable execution, clean coordination, and consistent manpower, even in fast-track and logistically challenging environments.

Safety, compliance, and jobsite control are central to how we operate. We enforce strict safety protocols, meet all regulatory requirements, and integrate seamlessly with GC safety and scheduling programs. Our workforce is comprised entirely of trained, skilled union tradespeople, enabling CDI to scale efficiently, reduce risk, and deliver work that meets demanding quality standards without compromise.

“ We build on experience and relationships. ”
